

Name	AirJoule Technologies
Ticker	Nasdaq: AIRJ
Year Founded	2019
Headquarters	Ronan, Montana
Employees	24 <sup>(1)</sup>
Market Cap.	\$508 million <sup>(2)</sup>

AirJoule Technologies is the developer of AirJoule®, an atmospheric water harvesting technology that provides efficient and sustainable air dehumidification and pure water from air. Designed to reduce energy consumption and generate material cost efficiencies, AirJoule® is being commercialized through a joint venture with GE Vernova and through partnerships with Carrier Global Corporation and BASF

LEADERSHIP

- Matt Jore**  
*Founder and Chief Executive Officer*
- Pat Eilers**  
*Executive Chairman*
- Stephen Pang**  
*Chief Financial Officer*
- Chad MacDonald**  
*Chief Legal Officer*
- Bryan Barton**  
*Chief Commercialization Officer*
- Ramdas Rao**  
*President, International*

MOF supplier

Joint venture partner

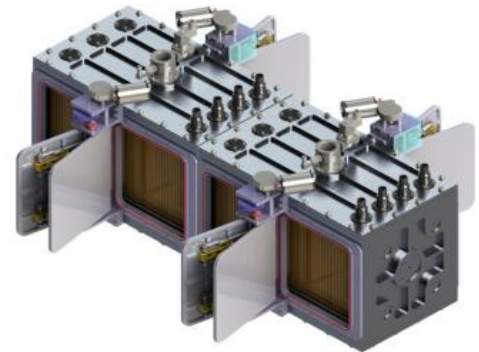

Joint venture partner

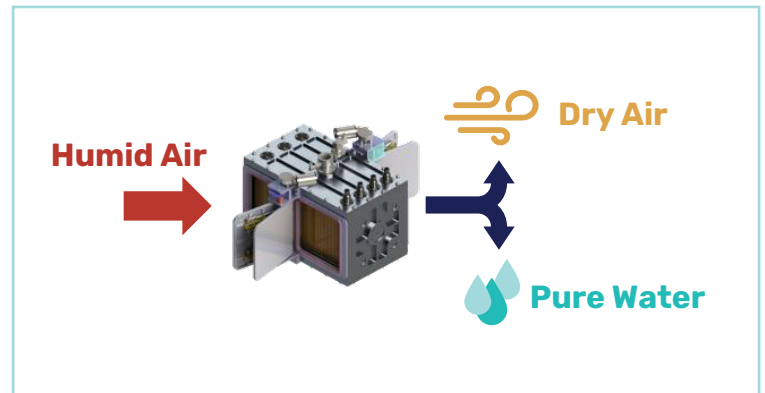

Commercialization partner for HVAC

# A Transformational Climate Technology for Cooling & Water Systems

Rendering of latest AirJoule® prototype

AirJoule® utilizes a Metal Organic Framework (“MOF”) and a dual-chamber vacuum system to produce dehumidified air and pure, PFAS-free, distilled water from ambient air, which are key inputs for a variety of industrial processes

INVESTMENT HIGHLIGHTS

- ✓ TRANSFORMATIONAL TECHNOLOGY
- ✓ ~\$450 BILLION ADDRESSABLE MARKET
- ✓ GLOBAL PARTNERSHIPS IN PLACE
- ✓ CAPITAL EFFICIENT BUSINESS MODEL
